

Important information for parents or guardians of students that would like to have their student's P-EBT benefit level reconsidered.

During this COVID pandemic, Federal funding was issued to free and reduced eligible families who attended a school where there was school closure or online learning during the 2020/2021 school year. If your student attended online learning at GWA during any of the following months, and the student qualified for free or reduced meals you may apply for reconsideration of this funding to help your family with grocery costs.
