

## **Health Protocols 2021-2022 School Year**

This protocol was developed in collaboration with the Southwest Utah Public Health Department. GWA will plan to implement the following procedures for the 2021-2022 school year regarding the health and safety of our staff and students.

- If your student is showing any sign of illness, please keep them home until 24 hours after symptoms have left.
- When students or staff members test positive for COVID-19, they will need to quarantine at home based on the time frame that the health department has set.
- Parents and families will be notified when their child has been exposed to COVID-19. Exposure is being in a 6-foot area of the positive individual.

### Protocol:

- The Southwest Utah Public Health Department will inform the parents and GWA when a school-age child has tested positive for COVID-19.
- The student who tested positive will be provided with another learning option but will not be physically in the building.
- Students who have been exposed but have not tested positive are not required to quarantine.
