

# Homework Procedure

---

Current research supports minimal homework in elementary and intermediate school settings. GWA will ask each child to read daily for a specific time, independently or with a family member or guardian, time spent will depend on the child's age and ability (see [GWA 520-Homework Policy](#)). All other homework will be minimal and should be able to be completed independently.

We recognize our curriculum's rigorous nature and will continue to be intentional with our instruction during the school day. In doing so, children will have the ability to play, interact, and participate in age-appropriate activities away from school. Parents or Guardians with specific homework questions should speak with their child's teacher.
